

I would like to urge the FCC not to implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has had a substantial impact on the amount of unwanted calls that I get at home, cutting them about 75%. This has helped to cut down the number of interruptions and distractions that I experience at home, as well as helping to protect my privacy against commercial intrusions. Preempting this law in favor of one lower national standard would be a step in the wrong direction. It would place the interests of corporations over the interests of ordinary citizens. Thank you for considering this comment.
